

Question 1

Recreate the following website using HTML elements. The website has a header containing an H2 header and a navigation link. The main section contains an H1 header, and some content. There is also a footer with some content.

Header Content

[mylink](#)

Main Content

Section content for website

Footer Content

Footer content

- Apply CSS styling to set all H2 headers to blue.
- Add a CSS styling to set only the heading for Main Content to green using a class called main.
- Add a CSS styling to set only the paragraphs in main and footer to yellow. Use a class for this.
- Using an ID, add a CSS styling to align the content of all text the main content to center.

Question 2

You have the following HTML

```
<div>
  <p id="paragraph">Hello world, welcome to frontend zero to hero</p>
</div>
```

And the CSS is as follows:

```
p {
  font-size: 120%; /* option one */
}

div p {
  font-size: 0.5em; /* option two */
}

#paragraph {
  font-size: 10px; /* option three */
}
```

State the font-size that will be applied, and justify why.
